REACT JS

SYLLABUS

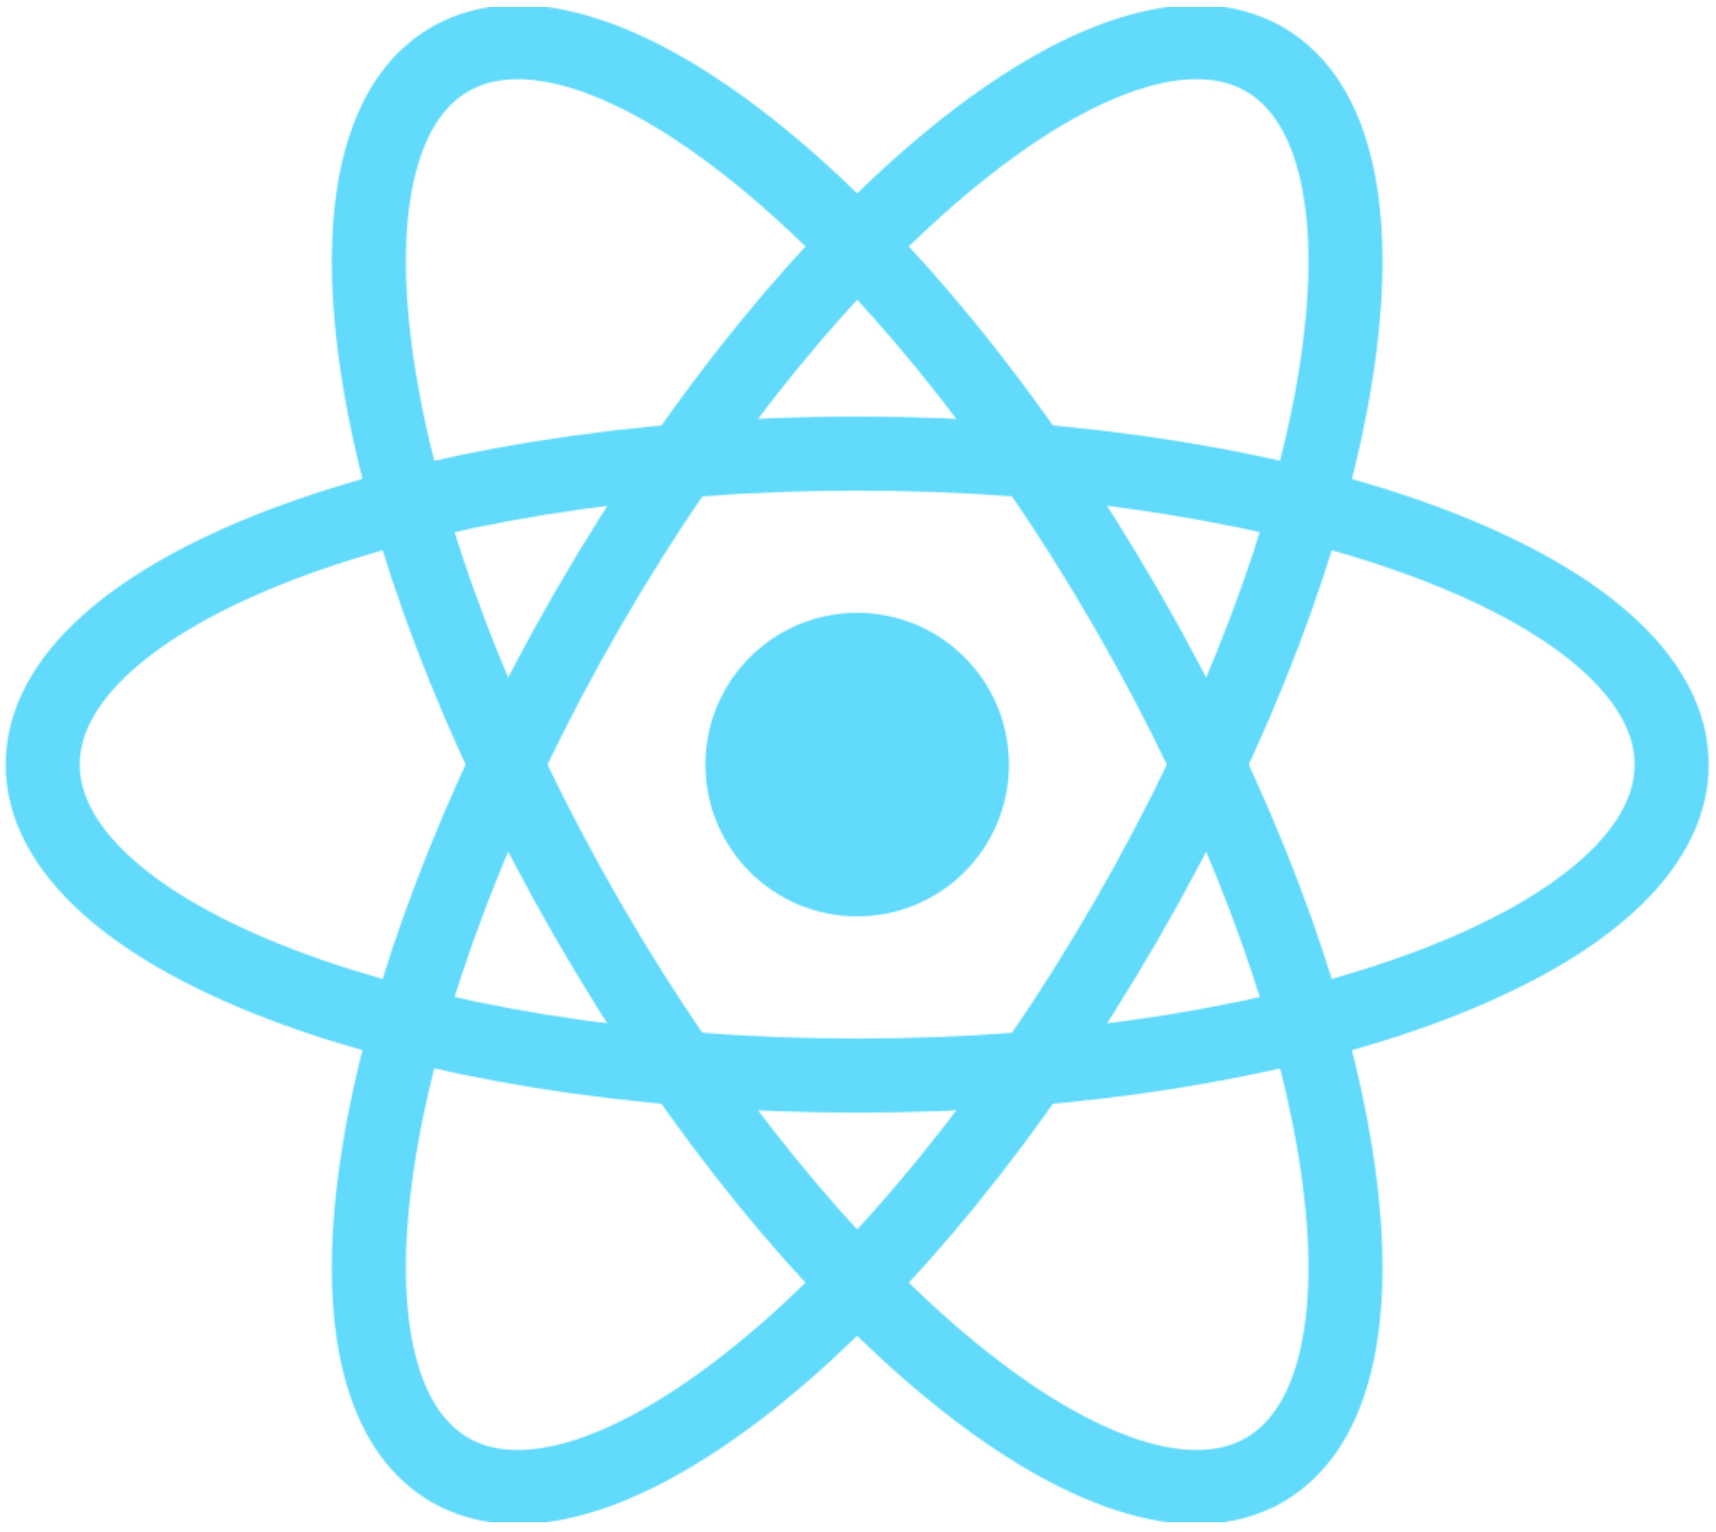

Table of Contents

About the Tutorial

Audience

Prerequisites

1. ReactJS - Introduction

React versions

Features

Benefits

Applications

2. ReactJS - Installation

Toolchain

The serve static server

Babel compiler

Create React App toolchain

3. ReactJS - Architecture

Workflow of a React application

Architecture of the React Application

4. React — Creating a React Application

Using CDN

Using Create React App tool

Files and folders

Source code of the application

Customize the code

Run the application

Using custom solution

ReactJS - Using Rollup bundler

Using Parcel bundler

5. React — JSX

Expressions

Functions

Attributes

Expression in attributes

6. ReactJS — Component

Creating a React component

Creating a class component

Creating a function component

7. React — Styling

CSS stylesheet

Inline Styling

CSS Modules

8. React — Properties (props)

Create a component using properties

Nested components

Use components

Component collection

9. React — Event management

Introduce events in Expense manager app

10. React — State Management

What is state?

State management API

Stateless component

Create a stateful component

Introduce state in expense manager app

State management using React Hooks

Create a stateful component

Introducing state in expense manager app

Component Life cycle

Working example of life cycle API

Life cycle api in Expense manager app

Component life cycle using React Hooks

React children property aka Containment

Layout in component

Sharing logic in component aka Render props

Pagination

Material UI

11. React — Http client programming

Expense Rest Api Server

The fetch() api

12. React — Form programming

Controlled component

Uncontrolled Component

Formik

13. React — Routing

Install React Router

Nested routing

Creating navigation

14. React — Redux

Concepts

Redux API

Provider component

15. React — Animation

ReactJS

React Transition Group

Transition

CSSTransition

TransitionGroup

16. React — CLI Commands

Creating a new application

Selecting a template

Installing a dependency

Running the application

17. React — Building and Deployment

Building

Deployment
